ИК-Фурье спектрометр FT-IR Spectrometer

ATP8900 FT-IR spectrometer employs high-performance-to-price ratio, considered users application habits, and they are widely applied to pharmaceutical, chemical, food, petrochemical, gemstones, macromolecule, semiconductor, material science etc. It can be attached to various accessories of transmission, diffuse reflection, attenuated total reflection (ATR), non-contact external reflection etc. Whatever they are applied to Universities, scientific research, or industrial fields of QA/QC application analysis, ATP8900 will be your ideal model.

ATP8900 FT-IR spectrometer employs new type of maglev plane mirror, driven by electromagnetic, with 3-D laser control, digitalizing continuous auto-adjust, DPS controllable, auto optimized system energy, without manual adjustable.

ATP8900 is configured intelligent auto reminder of humidity, which can reduce operator maintenance works. Electronic humidity can be intuitively displayed in numerals will remind users to replace desiccant in order to avoid potential risk during operation;

ATP8900 fit to measure powder, liquid with easy-to-operate, it takes only few steps to finish tests.
